

## Tank Quote Form

These drawing show some of the most common tank forms.

The top of the tank is usually level and square to the vertical end panel. If your requirements are different please draw the tank on a separate sheet with as much detail as possible.

The dimensions indicated on each drawing are necessary for us to produce a quote.

### Fittings:

We always fit threaded sockets, please indicate position and sizes required. Hose and hosesails, both straight and bent, and pipeclips are detailed in the [Hose section](#) of our website. Position of inspection hatch.

If waste or diesel tank indicate which fitting requires a drop tube.
